

# KRISEVA ATTEST

An entity-side evidence-integrity and human-accountability layer for AI-assisted regulatory reporting in GIFT IFSC.

---

**This prototype is final for this application. Whether it becomes the company's product is deliberately still open.**

Research-stage prototype · synthetic data · no filing · no regulator connection

# 01

/kriseva-attest](https://ayushtiwary-ops.github.io/kriseva-attest)

# A human still owns the source question

## ACCOUNTABILITY QUESTION

**Structured returns do not remove the source question.**

Which source supports this reported field?

### STATEMENT

---

### LEDGER

---

### SCHEDULE

---

Statements, ledgers and schedules can disagree or leave evidence missing.

The operator, buyer, frequency, pain and willingness to pay remain unvalidated.

# DRR targets submission; evidence starts upstream

## DRR

DRR (IFSCA's Digital Regulatory Reporting platform, procured 2026): structured reporting channels, validation and submission infrastructure.

## ATTEST

Provider-neutral source references, disagreement and human review

**No filing. No DRR connection. No claimed gap.**

**Public absence is not proof.**

# One fictional case makes three evidence states visible

Meridian Horizon  
Fund I (Meridian  
Horizon Fund  
Management IFSC Pvt  
Ltd)  
QE 30 Jun 2026

FICTIONAL

SUPPORTED

Closing NAV                      USD 12.4M agrees across two sources

CONFLICTING

Committed capital              USD 25M vs USD 24M

UNSUPPORTED

Complaints closed              no candidate evidence

# Preserve the handoff, not just the answer

o1 SOURCE · exact  
page, region or cell

o3 ESCALATE · no  
default winner

o5 RETAIN · local  
JSON and printable  
HTML manifest

o2 COMPARE ·  
preserve agreement  
and disagreement

o4 DECIDE · named  
reviewer and reason

# The prototype knows when to stop

## DETERMINISTIC TRACE

### PROPOSE

candidate evidence and exact references

## ABSTAIN

no candidate evidence; request more

### DECIDE

only a named human can accept, correct, reject or defer

---

No live model. No compliance conclusion. Harness built and tested before any model enters.

# The current build exposes the full evidence record

## CURRENT LOCAL BUILD

| CANDIDATE A SYNTHETIC DEMO DATA                                                                                                                                                                                                                                                                                                                                      | CANDIDATE B SYNTHETIC DEMO DATA                                                                                                                                                                                                                                                                                                                          |

|                 |                                                                                               |                              |
|-----------------|-----------------------------------------------------------------------------------------------|------------------------------|
|                 |                                                                                               | Confirming Principal Officer |
| Action          | ACCEPT                                                                                        |                              |
| Selected source | admin-committed                                                                               |                              |
| Reviewer        | Demo Reviewer                                                                                 |                              |
| Reason          | Administrator figure ties to the executed subscription register; earlier schedule superseded. |                              |
| Recorded at     | 2026-08-12T12:00:00+05:30<br>Fixed synthetic demo timestamp                                   |                              |
| Role            | Confirming Principal Officer                                                                  |                              |

Conflict stays side by side.

Human reason is required.

Receipt retains fingerprints, both candidates and unresolved evidence.

Synthetic data only · no filing · no regulator connection

# Revenue here is a sensitivity test, not a forecast

ILLUSTRATIVE ARR SENSITIVITY

| ENTITIES | ₹3L    | ₹12L |
|----------|--------|------|
| 5        | ₹15L   | ₹60L |
| 50       | ₹1.5Cr | ₹6Cr |

Unproven gates: buyer, bundling risk, legal perimeter, paid test, support economics

HYPOTHESIS

*If the wedge locks: the same evidence substrate extends to adjacent regulated-reporting workflows (hypothesis)*

Not TAM/WTP.

# One accountable founder. One defined finance lane.

## AYUSH TIWARY

Engineering, integration, test evidence, packaging. KRISSEVA ships evidence-first, human-review procurement software in Indian defense today.

## FINANCE & BUSINESS ANALYSIS LANE

Case consistency, buyer hypotheses, pricing research, workflow QA.

**Proposed contributor · pending written acceptance and public attribution.**

# Use eight weeks to lock the wedge, or reject it

## ACCESS

2 FME (fund management entity) officers + 2 administrators + 1 independent compliance provider

Help us falsify quickly.

## CHALLENGE

Is upstream evidence outside DRR/bundled services?

## TEST

One controlled synthetic workflow only if discovery survives

## DECIDE

Lock or reject by week 8
